

2-port USB switch

General information

USB switch to share one USB device, such as a printer or scanner, with two PCs by pushing one of the buttons to select a PC.

The switch can also be used the other way around to operate two devices with a single PC.

Please note that the switch only works with USB devices that do not require constant contact with a PC, such as most printers, scanners, cameras, joysticks, PDAs, MP3 players and iPod docking stations.
